AUSTIN FORTSON

WEB DEVELOPER

TECHINICAL SKILLS

TECHNOLOGIES	FRAMEWORKS/ LIBRARIES	DATABASE
HTML	React/Redux	MYSQL
CSS	jQuery	MongoDB
Javascript	Material UI	
Node	Bootstrap	
Express		
Adobe Suite		

PROJECTS

STREETS

(Code | Demo)

A full stack search based application designed to find local musicians in any city using Soundcloud's API as well as find local shows using Ticketmaster's API, and discover new releases through Spotify's API.

- Used React with Material UI & React-Router-Dom for the front end development
- Used a node and express server with a MySQL database
- Designed to be mobile responsive
- Utilized API's based on user search input

CORNER STORE CLOTHING BRAND

(Code | Demo)

An HTML Email tested with PutsMail for responsiveness across 50+ different platforms and devices.

- HTML & Inline-CSS to code
- Used Adobe Photoshop for picture editing & design
- Teseted with PutsMail to ensure it works through real emails

SEASIDE SEAFOOD

(Code | Demo)

A single page website for a restaurant showcasing about them, a menu, operation hours and contact information

- Made with React & Materilize
- Features CSS animations & media queries
- Designed to be responsive
